

# Ordnance Cleaning Systems Capabilities

Our Ordnance Cleaning System was developed from the same design originated in Sweden 20 years ago. Our Vibrating Pneumatic Bore Brush (VPBB) design has a proven record, and is currently in use in many countries around the world. The pictures below shows the before cleaning dirty gun tube, and after cleaning resulting effect.

*The Ordnance Cleaning System is a portable bore cleaning unit for the 21<sup>st</sup> century equipped with many features:*

- Provides depot level cleaning in the field
- Requires one individual to operate system
- Supplied with military grade parts case
- Operates off compressed air (90-150 PSI)
- Can be hooked up to trailer brake supply
- Works in both smooth bore and rifled barrels
- Produces a Vibrating effect of scrubbing back and forth
- Available in Calibers ranging from 20mm to 155mm
- Significantly reduces man-hours
- Made in the USA!

### Labor Intensive Manual Method

- Multiple personnel physically actuating a ramming staff with steel wire brush end.
- 1 to 4 hours of labor depending on how dirty and what level of cleanliness desired to achieve.
- Angle of the brush can damage barrel.
- Uneven cleaning of the barrel
